

Career & Technical Education (CTE) Employment Outcomes Survey 2016 Monterey Peninsula College

Background

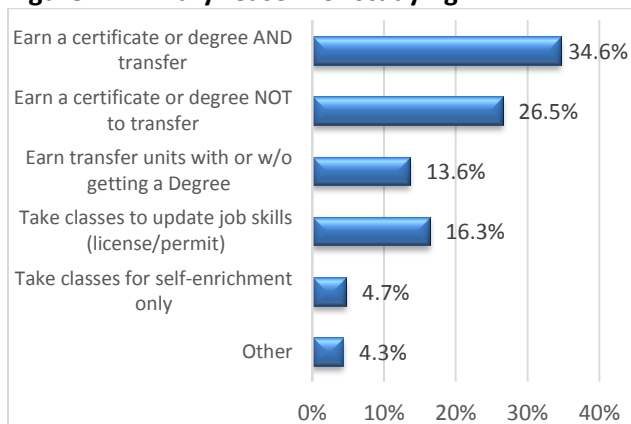

Skills-building students from Monterey Peninsula College were surveyed if they met one of the following criteria in 2013-2014, and did not enroll in 2014-2015: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2016 by e-mail, telephone and US mail. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career.

A total of 896 students were surveyed and 257 unduplicated students responded, 37 of whom responded by e-mail (14.4%), 196 by telephone (76.3%), and 24 (9.3%) by US Mail, for a total overall response rate of 28.7%.

Results

- Respondents were asked their primary reason for studying at Monterey Peninsula College, and the majority (61.1%) indicated earning a certificate or degree (with or without transfer). Figure 1 shows the results.

Figure 1. Primary reason for studying

- Respondents were asked why they stopped taking classes at Monterey Peninsula College. Here are the most frequently cited reasons, in rank order of frequency:

- ✓ My goals were met (140)
- ✓ I completed the program (139)
- ✓ I got a job (76)
- ✓ Transferred to another school (76)

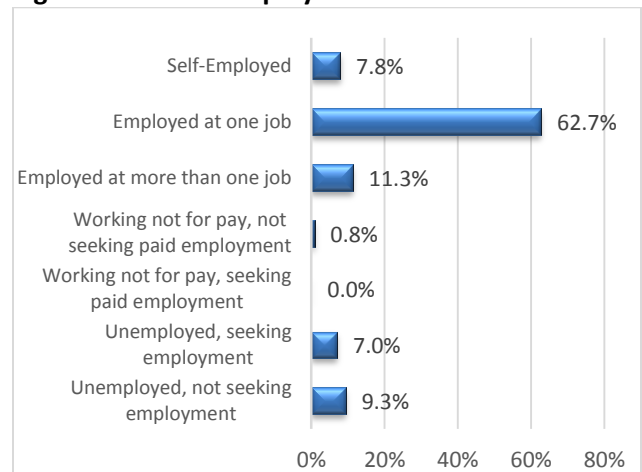

- 61.1% of former students were “very satisfied” with the education and training they received at Monterey Peninsula College, and 31.9% were “satisfied” for an overall satisfaction rate of 93.0%.

- 38.9% of respondents indicated they had transferred to another College or University.

- 81.7% of respondents are employed for pay.

Figure 2 shows the results.

Figure 2. Current Employment Status

- Overall, statewide, students who transferred have 1.7 times the likelihood of being unemployed and not seeking employment (7.1% for not transferring vs. 12.0% for transferring), likely because they are enrolled at a four year institution.

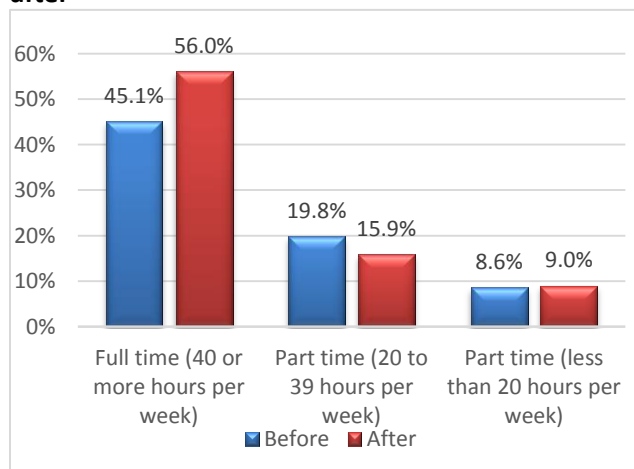

- Respondents were asked, if currently employed, how closely related their job is to their field of study at Monterey Peninsula College. 50.5% indicated they are working in the same field as their studies and training, followed by 21.2% indicating they work in a field that is “close” to their studies and training, and 28.3% indicated their job is not related to their studies. When asked if they were actively seeking a job in another field, 6.7% of employed respondents said no.

- Of those respondents who engaged in a job search after finishing their studies, 78.2% reported finding a job and 21.8% were still looking. Of those with a successful job search, 78.9% found a job within six months (62.0% within three months).

- Of currently employed respondents, 14.4% had been employed at their current job less than six months, 16.3% between six months and one year, 21.5% between one and two years, 17.7% between two and three years and 29.2% had been employed at their current job for more than three years.

- Before their studies, 45.1% of respondents worked full time. After completing their studies, 56.0% work full time. Figure 3 shows the results.

Figure 3. Work status before studies/training and after

- The hourly wage of all respondents increased 32.9% from their hourly wage before their studies

(\$19.82) to their hourly wage after completing their studies (\$26.34). Figure 4 shows the results.

Figure 4. Earnings before studies/training and after

- Respondents, including those who had transferred, were asked what impact their coursework had on their employment. Here are the responses, listed in rank order of frequency:

- ✓ No impact on my employment (69)
- ✓ Prepared me for a possible new job (63)
- ✓ Enabled me to learn skills that allowed me to get a job at a new organization (45)
- ✓ Enabled me to learn skills that allowed me to get a promotion at my same organization (26)
- ✓ Enabled me to learn skills that allowed me to stay in my current job (24)
- ✓ Enabled me to start my own business (10)

Summary and Conclusions

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed, are working in the same field as their studies or training, and are working full time. Respondents overall posted a 32.9% increase in their hourly wage after completing their studies at Monterey Peninsula College and the vast majority were satisfied with the education and training they received.
