Freshdesk Board Update

Admissions & Records will be going live with Freshdesk, a customer service suite, in December. Freshdesk, currently in use by MPC Online, allows students to submit a ticket for assistance, much like our current IT Helpdesk system. The system is interactive, displaying assistance articles in relation to the topic being requested. Admissions & Records staff will have the option to respond directly to the student with custom messages, canned responses, or prepared solutions. Students will have access to the system at any time of day or night, from any location via the internet, without the need to create a log in. Tickets will be responded to as quickly as possible, during regular business hours, in accordance with a service agreement published to the student. Analytics gathered from the program will help Admissions & Records with student learning outcome data, business process analysis, and the continued improvement of service to our students.
