4. Explain how this position supports student learning.
An Instructional Specialist in the Math Learning Center provides high quality tutoring and instruction to individual and/or groups of students for all Math courses (excluding Math 20A and higher). Because the ideal Instructional Specialist would be very experienced in Math, they would increase the MLC's ability to help students in a timely manner, and thus, increase the number of students the Center can serve. This position also trains the peer tutors who assist in providing supplemental instruction to students.
5. Explain what would happen if the position weren't approved.
If this position were not approved, the Math Learning Center would not be able to serve students in a timely, equitable manner. It is not in the best interest of students to spend time waiting for a tutor to be available as opposed to spending their time getting the assistance they need. Without this Instructional Specialist, the MLC would be critically understaffed during busy times with large amounts of students needing help simultaneously, and thus the MLC would be irreparably worsened if this position was not continued. There are times where every seat in the MLC is occupied and we need adequate staffing for those extremely busy times.
