Dear [Student First Name],

Did you know that students who use the campus support services in the Starfish Student Success Network are more likely to pass their courses and complete their academic goal(s)?

Below you will find a referral that I believe will help you. If you have not been contacted by the Math Learning Center (MLC) within two business days, please follow up with this office as soon as possible to get the assistance. They help you build skills and techniques in math so you can excel in your classes.

The MLC offers online and in-person tutoring support in algebra, statistics, precalculus, and classes that require basic math skills (like pharmacology and more) too. They can also help you with you get familiar with your calculator, Statcrunch, and more.
